Objective

Software Developer with experience in full-stack and backend development, API-driven systems, cloud deployments, and automation, with strong analytical and problem-solving skills.

Technical Skills

Programming Languages: C++, C, Python, JavaScript, TypeScript, SQL
Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS
Backend Technologies: Node.js, Express.js, RESTful APIs
Databases: PostgreSQL, MySQL, MongoDB
Testing & Automation: Unit Testing, API Testing, Automated Functional Testing, Postman
Cloud & DevOps: AWS (EC2, S3, Lambda, CloudWatch), Linux, Git, GitHub, CI/CD (basic), VS Code

Experience

UPROI Digital Pvt Ltd.

April 2026 – Present

Full Stack Developer

- Designed and developed a dynamic college listing page with filtering and search functionality to help users easily explore colleges based on location, category, and preferences.
- Implemented complete SEO optimization across the Home, College, and College Listing pages, including sitemap integration, improving search visibility and overall site performance.

Genic Minds Tech Pvt Ltd.

January 2026 – April 2026

Full Stack Developer Intern

- Developing and maintaining a production-level HRMS web platform using React.js, ensuring responsive UI, dynamic content rendering, and seamless backend integration with RESTful APIs and MySQL.
- Designed and integrated RESTful APIs with secure authentication and role-based access control (RBAC), ensuring efficient data handling and optimized SQL queries for high-performance operations.

HashPunch LLP

June 2025 – August 2025

Software Developer Intern

- Built scalable, API-driven backend systems for AI tools (GitHub Issue Generator, Intent Classifier, Bug Detector) using Node.js, Express.js, and MongoDB, reducing API response time by 40%.
- Built automation workflows in an ITSM platform to classify, prioritize, and route tickets, improving resolution efficiency.
- Designed automated functional and API-level tests ensuring system reliability and deployed monitored backend services on EC2, S3, and Lambda using AWS CloudWatch in Linux.

Projects

MedClerk – AI-Powered Medical Report Organizer (medclerk.in) | *React.js, Node.js, Express.js, AWS S3, PostgreSQL*

- Developed a full-stack, API-driven healthcare platform to securely organize and manage digital medical records.
- Implemented JWT-based authentication and role-based access control (RBAC) to ensure access for patients and doctors.
- Integrated AI/OCR pipelines to automatically extract, classify, and summarize medical reports.

TalentTrek - Job Portal([Link](#)) | *React.js, Node.js, Express.js, MongoDB, JWT*

- Built a MERN-based job portal with API-driven authentication, job posting, and application workflows.
- Implemented AI-powered resume screening to automatically analyze and shortlist candidates.
- Developed a job recommendation feature based on user skills and interests, supported by secure backend APIs.

Education

KCC Institute of Technology and Management

Sep 2022 – May 2026

B.Tech in Computer Science and Engineering (AIML) — CGPA: 8.0

Greater Noida, Uttar Pradesh

Achievements

- Ranked in the top 0.2% of students in college, demonstrating strong academic and problem-solving skills.
- Solved 450+ DSA problems on LeetCode and GeeksforGeeks, demonstrating strong problem-solving ability.
